

## Canary Islands – A Safe Destination!

Dear Member

The Canarian Government has decreed in the law 17/2020 of 29th October the following, which comes into force **for all arrivals from the 14<sup>th</sup> November 2020**.

To maintain the archipelago's low incident rate for the pandemic and guarantee the sustainability of our tourist activity, **all visitors over the age of six arriving to the islands must present a certificate that is officially recognised by the healthcare authorities to show that they have tested negative for active COVID-19 infection in the past 72 hours**.

This certificate will be required to check into the Anfi clubs and any other tourist accommodation on the islands. The certificate must show the following information: -

1. The date and time the test was taken
2. The identity of the person taking the test
3. The laboratory responsible for the verification and the nature of the laboratory
4. The negative result

Please remember that a certificate is required for each of the members travelling in your party and who are over the age of six. This certificate will not be required for visitors who show proof that they have been in the Canary Islands for the 15 days prior to the check-in date in Anfi and that they have not had any symptoms of COVID-19 during that time.

Tourist establishments are required to refuse entry to anyone who does not comply with the above request for a certificate. Only in exceptional cases, will members be allowed to check-in and to take a diagnostic test in an authorised centre on the island, if they have not been able to do so before travelling. If this is the case, members will be allowed to check in and stay for the minimum time required to get your results, although you will be required to stay in your apartment until the results are received.

In case of inspection by the authorities, a copy of the certificates pertaining to the members in your party will be kept on file in the reception until your departure date and information regarding the protection of your personal data will be supplied at check-in.

We recommend downloading the RADAR COVID contagion notification app and keep it enabled on your mobile during your stay in the islands and for the 15 days immediately following your return to your place of origin.
